Intense Pulsed Light (IPL) Photo Rejuvenation - *Alma Harmony*

What is Photo Rejuvenation? Photo Rejuvenation is a series of Intense Pulsed Light Treatments that improve the appearance of the skin, which include the signs of rosacea, flushing, sun damaged skin, age spots, skin texture, and photo aging. The treatment also improves mild acne scars, reduces large pores, corrects dark circles around the eyes, and reduces fine lines. This exciting treatment involves little or no "down time". You can resume normal activities immediately.

How does the treatment work? An intense light is applied in a series of gentle pulses over the treatment area. Without damaging the skin, the light penetrates through the skin and is absorbed by the pigmentation. The heat impairs the lesion, and the body begins its natural healing process. The lesion will darken before it flakes off or is absorbed by the body. Treatment can be given as frequently as every three weeks.

What improvement will I see? Patients have a high degree of satisfaction with their results. Many have seen 70% to 90% improvement. After successive treatments, the skin will feel smoother and appear to have a more even tone.

How many treatments will I need? For optimal results, a series of 3 treatments are recommended. Some patients see significant improvement in 1 to 3 treatments; others require more. Follow-up treatments may be desired one to two times a year to maintain results.

What are the benefits of Photo Rejuvenation?

- Treatment improves sun spots, age spots, dull complexions, uneven pigmentation, large pores, sun damaged skin and early signs of aging
- Treatment improves red flushing skin, rosacea, and broken capillaries
- Enjoy smoother skin with a more even tone
- Minimal discomfort during treatment
- Resume regular activities immediately
